Dr. Joshua Lederberg, Chairman,
Dept. of Medical Genetics,
The University of Wisconsin,
Madison 6, Wisconsin.

Dear Joshua,

Thank you for your note with regard to my recent "entry" into the field of genetics. I am enclosing the reprint you requested. The paper on the inheritance of the erythrocyte glucose-6-phosphate dehydrogenase deficiency is scheduled for August publication and I will send you a copy at that time.

I have heard, I think from Art Kornberg, of your impending move to Stanford. I spent last summer working with Ruth Gross, in the Dept. of Pediatrics, on this problem of red cell glucose-6-phosphate dehydrogenase deficiency and had a magnificent time. The medical school does indeed appear to be making very rapid progress in building up first class departments. The very best of luck on the coast.

Best regards.

PAUL A. MARKS
Asst. Prof. of Medicine
